

Scientific workshop

Detecting climate change hotspots and potential refugia at different scales to advance marine conservation

Israel Oceanographic and Limnological Research Institute (IOLR), 19-21 March 2018

Location

The workshop will take place at the National Institute of Oceanography of IOLR on the coast of Haifa. The map below shows the location of the IOLR building and the Bat Galim train station. The best way to get to Haifa is the train directly from the airport. The station you get off in Haifa (there are three) depends on the accommodation you choose. The nearest one to IOLR is the **Bat Galim** station, a 20 minute walk or a short taxi drive.

Accommodation

There are relevantly few places in the Bat Galim neighborhood itself. There are many options at the downtown area or the Carmel mountain part of the city.

Bat Galim area

Bat Galim Boutique Hotel,
<http://www.batgalim-boutique-hotel.co.il/en>

Sea Plaza, <http://www.seaplaza.co.il/home>

I also recommend checking the AirB&B website for options.
